Nintendo
AUTHORIZED REPAIR CENTER™

In 1990 Nintendo introduced a nationwide network of Nintendo Authorized Repair Centers℠. Nintendo's goal was to provide outstanding local factory authorized repair service to customers.

Nintendo technicians trained the best repair centers throughout the United States to ensure consistent high quality service. Then these top rated repair centers were provided with parts and test equipment from Nintendo.

We are proud to be a part of the Nintendo Authorized Repair Center network. Any customer can swap their malfunctioning Super NES Control Deck®, NES Control Deck® or Game Boy® on the spot for a remanufactured unit[1]. That's a Power Swap℠!

If you decide to have your own system repaired, it can be done quickly. All parts are in stock, including replacement components such as Controllers, AC Adapters RF Switches, etc.

If one of your Nintendo products is not working properly, bring it to us or call us at the phone number below for shipping instructions.
